DESIGNED BY GROOVEX

THE 5-TRACK LOOP STATION FOR ABLETON LIVE, MAC AND PC

livelooper

Five tracks.
One groove.
No limits.

livelooper turns a voice, a guitar or a beatboxed kick into a complete song – live, in real time, without ever stopping.

VST3 | AU | Standalone | macOS | Windows | EN / DE

IMAGINE …

One press.
And one idea becomes a band.

Looping means: you play something, it keeps going – and you play along. Layer by layer, bar by bar. livelooper turns that into an instrument as immediate as a stompbox and as deep as a studio.

01

The stage

Saturday, 11:40 pm. You're alone on stage. One guitar, one laptop. Tap track 1 – a chord pattern. Track 2 – the bassline through overdrive. Track 3 – a picked riff, played in reverse. Suddenly the room sounds like four musicians. None of them rehearsed.

02

The bedroom studio

Midnight, headphones on. You beatbox a kick, then a snare, then a hi-hat shuffle – all quantized to the bar. One press of UNDO when an overdub misses. A slicer on the vocal, reverb over everything. At 12:15 you export your first track as a WAV.

03

The street

Golden light on the market square. MacBook on a crate, no controller? No problem: keys 1 to 5 start your tracks, Space stops everything, Return taps the tempo. By the third song a hundred people are watching – and nobody guesses you're playing your laptop keyboard.

THE INTERFACE

Everything at a glance. Everything in reach.

Designed like a hardware unit: big pads, LED rings, a clear display. No menu maze – every function sits exactly where your hand expects it.

1 Display
Tempo, bar and beat, quantization and messages. Click the BPM – and simply type your tempo.

2 Input FX A–D
Four effects right on the input – record through a filter, delay or reverb.

3 FX editor
Pick the effect, turn two parameters and the mix. All live, no clicks.

4 Track FX A–D
Four more effects on what you hear – switchable per track.

5 5 tracks
Each with status display, level, pan, reverse, one shot, undo/redo and its own setup.

6 REC / DUB / PLAY
The big pad: record, overdub, play. The LED ring shows where the loop is.

7 Rhythm
Drum machine with 11 patterns and tap tempo – always in time with your loops.

8 Master
Quantize, host sync, master, input, fade – plus ALL START / STOP.

9 MIDI learn
Click a control, move a knob on your controller – mapped.

A SONG IN 90 SECONDS

This is what layer by layer sounds like.

An example of how a complete loop song comes together – with nothing but a voice and a guitar:

0:00 — **Press B, type “92”, Return.**
The tempo is set. The rhythm counts you in with a metronome.

0:05 — **Track 1 · Beatbox**
Kick and snare – quantize “Measure” cuts the loop to exactly two bars.

0:20 — **Track 2 · Guitar**
Chords, recorded through the “Phaser” input FX. Fixed loop: 4 bars.

0:40 — **Track 3 · Bass**
Low strings plus the “Lo-Fi” track FX – sounds like an old record.

0:55 — **Track 4 · Voice**
An “ooh” choir in three overdubs. One was off? UNDO – gone.

1:10 — **Track 5 · Reverse**
A guitar run, played backwards. Instant goosebumps.

1:30 — **Space.**
ALL STOP – faded out cleanly at the end of the bar. Applause.

MIDI, NO DETOURS

Click MIDI LEARN, click a control, then move a knob or hit a pad on your controller. Done. The purple frames always show what is already mapped.

THE FEATURES IN DETAIL

Built for the moment that counts.

Five loop tracks

REC → DUB → PLAY on one pad, STOP (hold = clear), undo/redo of the last overdub, level, pan, reverse, one shot and loop sync. Fixed lengths from 1 to 16 bars, or free.

Tight timing

Quantize to the bar or beat. Pressed too late? Up to 15 % after the bar line livelooper corrects it retroactively – the loop still lands.

In sync with Live

Tempo, time signature and transport come from Ableton Live. With “Follow host transport” loops start and stop with Live's play button.

12 effects, 8 slots

Low-pass, high-pass, band-pass, phaser, flanger, delay (tempo-synced), reverb, slicer, tremolo, auto pan, lo-fi and overdrive – four slots each for input and tracks.

Rhythm included

Built-in drum machine with metronome and 11 patterns – rock to shuffle – plus tap tempo.

Start and stop modes

Immediate, fade in, fade out or stop at loop end. Overdub or replace. Transitions that sound pro.

Everything on MIDI

All 136 functions are host parameters for Live's MIDI map – plus built-in MIDI learn via right-click and a default map at one click.

Computer keyboard

In the standalone app you play livelooper from the keyboard: logical default keys and your own key for every function.

Type in the tempo

Click the BPM on the display or press B: type the tempo, Return – done. Decimals included.

Saved with your project

Your loops are stored losslessly (FLAC, 24 bit) in the Live set. Export as WAV, import by drag & drop.

Bilingual

Interface, menus, tooltips and manual in English and German – automatically following your system language.

Standalone & plug-in

VST3 and AU for Ableton Live and other DAWs – or a standalone app with free choice of audio interface, sample rate and buffer size.

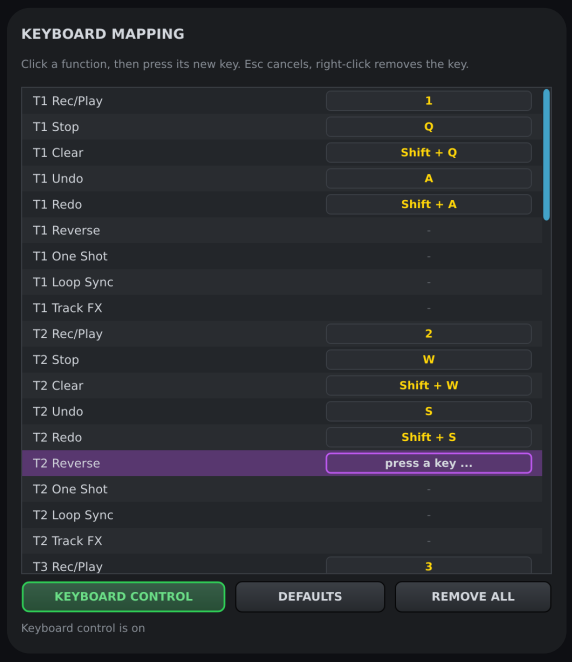

PLAY IT FROM THE KEYBOARD

Your MacBook is the controller.

In the standalone app every function is one key away – laid out like the tracks themselves: one keyboard column per track. Under SETUP → Keyboard mapping you set your own keys, with Shift, Ctrl, Option or Cmd.

TRACK 1	TRACK 2	TRACK 3	TRACK 4	TRACK 5	
1	2	3	4	5	REC/PLAY
Q	W	E	R	T	STOP · WITH SHIFT: CLEAR
A	S	D	F	G	UNDO · WITH SHIFT: REDO

Space	All start / stop	**Return**	Tap tempo	**B**	Type in tempo	**↑ ↓**	Tempo ± 1 BPM
M	Rhythm on/off	**N**	Next pattern	**K**	Quantize	**Shift + ⌫**	Clear all

Your own mapping: click a function, press a key – done.

Type the BPM right on the display.

SPECIFICATIONS

livelooper

FORMATS	VST3 · Audio Unit (macOS) · standalone app
SYSTEMS	macOS 11 or later · Windows (64-bit)
HOST	Ableton Live and other VST3/AU hosts
TRACKS	5 stereo loop tracks, up to 480 s per track
EFFECTS	12 types, 4 input FX and 4 track FX slots
RHYTHM	metronome + 11 patterns, tap tempo, 40–300 BPM
CONTROL	136 MIDI functions, MIDI learn, computer keyboard (standalone)
STORAGE	Loops in the project, FLAC 24 bit · WAV export · audio import
LANGUAGES	English and German

MADE FOR

Singer-songwriters

Backing, choir and bass – all from your own voice and guitar.

Beatboxers

Kick, snare, hi-hat: a groove in seconds that never drifts.

Guitarists & bassists

Lay down the rhythm, solo on top, experiment in reverse.

Producers

Capture ideas in Ableton Live before they're gone – saved right in the set.

Street musicians

A MacBook instead of a pedalboard: the keyboard is the controller.

Teachers & workshops

Make harmony and rhythm audible – layer by layer.

Your next loop is already waiting.

Download livelooper and start playing:
