

BeatTactics
DESIGNED BY GROOVEX

THE LOOP STATION FOR ABLETON LIVE, MAC AND PC · VERSION 1.3

livelooper

Up to eight tracks.
One groove.
No limits.

livelooper turns a voice, a guitar or a beatboxed kick into a complete song – live, in real time, without ever stopping. Now with Ableton Push control, scenes and a new rhythm section with swing.

VST3 · AU · Standalone · macOS · Windows · Ableton Push · EN / DE

IMAGINE …

One press.
And one idea becomes a band.

Looping means: you play something, it keeps going – and you play along. Layer by layer, bar by bar. livelooper turns that into an instrument as immediate as a stompbox and as deep as a studio.

01

The stage

Saturday, 11:40 pm. One guitar, one laptop, one Push. Track 1 – chords. Track 2 – the bass through overdrive. Track 3 – a riff, in reverse. Hit scene 2, and at the next bar line the whole song jumps to the chorus. The room sounds like four musicians. None of them rehearsed.

02

The bedroom studio

Midnight, headphones on. The 808 kit runs at 58 % swing and you just jam – nothing recording. There it was, that line! CAPTURE brings back the last four bars as a loop, instantly in time. At 12:15 you export every track as stems for Ableton Live.

03

The street

Golden light on the market square. MacBook on a crate, no controller? No problem: keys 1 to 5 start your tracks, Space stops everything, Return taps the tempo. By the third song a hundred people are watching – and nobody guesses you're playing your laptop keyboard.

Everything at a glance. Everything in reach.

Designed like a hardware unit: big pads, LED rings, waveforms and meters. No menu maze – every function sits exactly where your hand expects it.

1 Display
Tempo, bar, quantize, messages and master meter. Click the BPM – and type your tempo.

2 Input FX A–D
Four effects right on the input – record through a filter, delay or reverb.

3 FX editor
Pick the effect, turn two parameters and the mix. All live, no clicks.

4 Track FX A–D
Four more effects on the tracks – switchable per track.

5 5 or 8 tracks
With waveform, meter, pan, reverse, one shot, undo/redo and their own setup.

6 REC / DUB / PLAY
The big pad: record, overdub, play. The LED ring shows the loop position.

7 Rhythm
4 kits, 21 grooves, swing and feel – trap to Afro house, plus tap tempo.

8 Master
Quantize, host sync, master, input, fade – plus ALL START / STOP.

9 MIDI learn
Click a control, move a knob on your controller – mapped.

10 Scenes 1–8
Store which tracks play – and switch, quantized to the next bar.

11 Capture
Brings back the last 1–8 bars you played as a loop – even without recording.

NEW IN VERSION 1.3

Hands on the pads. Eyes on the crowd.

Plug in an Ableton Push, press User – and livelooper takes over. No mapping, no setup. Every track gets its own pad column, lit in its colour, showing where the loop is right now.

Pads
REC/PLAY and STOP for each track on top, the loop position running below as a band of light.

Encoders
Level, pan, pitch, feedback or effects – switched with the mode buttons.

Master section
The rightmost encoders set master level and tempo, the swing knob sets the groove.

XY effect pad
The 8×8 grid becomes a performance pad: touch, slide, let go – back to the dry sound.

Display
Names, values, track states and tempo at a glance.

Scenes & capture
Scenes on the scene buttons, capture, undo, metronome and tap tempo on the function buttons.

RHYTHM WITH FEEL

Four kits, 21 grooves – and finally swing. The feel knob makes the machine play like a human: tiny variations in timing and velocity, ghost notes, hi-hat rolls.

Trap · Lo-Fi · Drum & Bass · Afrobeat · Dembow · UK Garage · Neo Soul · Disco · Afro House · House · Techno · Hip Hop · Funk · Rock · Bossa · Reggae

A SONG IN 90 SECONDS

This is what layer by layer sounds like.

An example of how a complete loop song comes together – with nothing but a voice and a guitar:

0:00 — **Press B, type “92”, Return.**
The tempo is set. Kit “Lo-Fi”, groove “Neo Soul”, swing at 60 %.

0:05 — **Track 1 · Beatbox**
Kick and snare – quantize “Measure” cuts the loop to exactly two bars.

0:20 — **Track 2 · Guitar**
Auto record starts with the first note. Through the “Phaser” input FX, fixed loop: 4 bars.

0:40 — **Track 3 · Bass**
Just jamming – then CAPTURE: the last four bars become the loop. Ducked to the kick.

0:55 — **Track 4 · Voice**
An “ooh” choir in three overdubs. One was off? UNDO – gone.

1:10 — **Scene 2 · Chorus**
One pad on the Push: verse out, chorus in – right on the bar line.

1:30 — **ALL STOP.**
Faded out cleanly at the end of the bar. Then: export stems. Applause.

BY THE NUMBERS

8 LOOP TRACKS	**21** GROOVES	**4** DRUM KITS
8 SCENES	**12** EFFECTS	**250** MIDI FUNCTIONS

MIDI, NO DETOURS

Click MIDI LEARN, click a control, then move a knob or hit a pad on your controller. Done. The purple frames always show what is already mapped.

THE FEATURES IN DETAIL

Built for the moment that counts.

Up to eight loop tracks

REC → DUB → PLAY on one pad, STOP (hold = clear), undo/redo, level, pan, reverse, one shot. 5 tracks, or 8 if you want – fixed lengths from 1 to 16 bars, or free.

Tight timing

Quantize to the bar or beat, retroactive correction up to 15 % after the bar line. The ghost playhead shows where a stopped track would be.

New rhythm section

4 kits (Studio, 808, 909, Lo-Fi) and 21 grooves from rock to trap, dembow, UK garage and Afro house. With swing, feel, ghost notes and hi-hat rolls.

Scenes

8 scenes store which tracks play. One press – and at the next bar the whole song moves from verse to chorus.

Capture & auto record

Capture brings back the last 1–8 bars you played without recording. Auto record starts with the first note – hands stay on the instrument.

Ableton Push

Pads with state and loop position, encoders for level, pan, pitch and effects, a master section with tempo, an XY effect pad – plugged straight in.

Sound per track

Tape-echo style feedback, sidechain ducking to the kick or track 1, pitch ±12 semitones, time-stretch on tempo changes, resampling of all tracks.

12 effects, 8 slots

Filters, phaser, flanger, tempo-synced delay, reverb, slicer, tremolo, auto pan, lo-fi and overdrive – four slots each for input and tracks.

Everything on MIDI

All 250 functions are host parameters for Live's MIDI map – plus MIDI learn via right-click. The standalone app adds a freely mappable keyboard.

Separate outputs

Each track on its own stereo output in Live or on your audio interface. Metronome on a separate cue output for your headphones.

Sets & stems

Loops stored losslessly (FLAC, 24 bit) in the Live set, whole looper sets as a file, stem export with tempo info – Live drops them right on the grid.

Bilingual, everywhere

English and German. VST3 and AU for Ableton Live and other DAWs – or a standalone app for macOS and Windows.

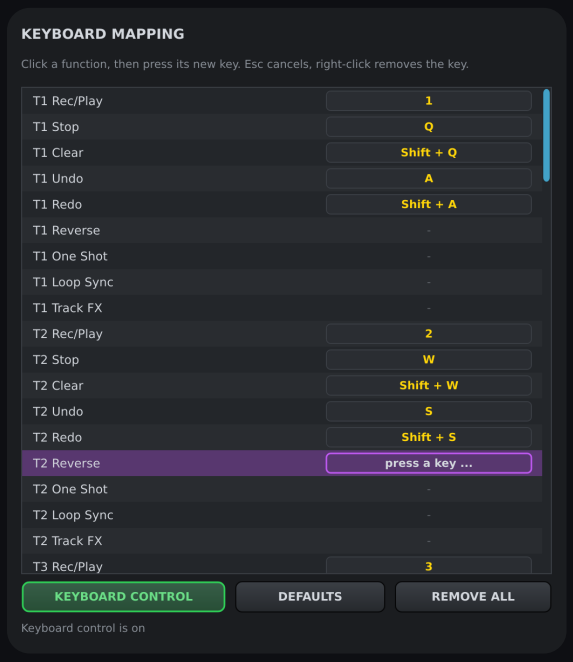

PLAY IT FROM THE KEYBOARD

Your MacBook is the controller.

In the standalone app every function is one key away – laid out like the tracks themselves: one keyboard column per track. Under SETUP → Keyboard mapping you set your own keys, with Shift, Ctrl, Option or Cmd.

TRACK 1	TRACK 2	TRACK 3	TRACK 4	TRACK 5	
1	2	3	4	5	REC/PLAY
Q	W	E	R	T	STOP · WITH SHIFT: CLEAR
A	S	D	F	G	UNDO · WITH SHIFT: REDO

Space	All start / stop	Return	Tap tempo	B	Type in tempo	↑ ↓	Tempo ± 1 BPM
M	Rhythm on/off	N	Next pattern	K	Quantize	Shift + ⌫	Clear all

Your own mapping: click a function, press a key – done.

Type the BPM right on the display.

SPECIFICATIONS

livelooper

FORMATS	VST3 · Audio Unit (macOS) · standalone app
SYSTEMS	macOS 11 or later · Windows (64-bit)
HOST	Ableton Live and other VST3/AU hosts
TRACKS	5 or 8 stereo loop tracks, up to 480 s per track, 8 scenes
EFFECTS	12 types, 4 input FX and 4 track FX slots
RHYTHM	4 kits, 21 grooves, swing, feel, metronome with 4 sounds, 40–300 BPM
CONTROL	250 MIDI functions, MIDI learn, Ableton Push, keyboard (standalone)
OUTPUTS	Main, up to 8 direct track outputs, cue output (standalone)
STORAGE	Loops in the project (FLAC 24 bit) · sets · WAV and stem export
LANGUAGES	English and German

MADE FOR

Singer-songwriters
Backing, choir and bass – all from your own voice and guitar.

Beatboxers
Kick, snare, hi-hat: a groove in seconds that never drifts.

Guitarists & bassists
Lay down the rhythm, solo on top, experiment in reverse.

Producers
Capture ideas in Ableton Live before they're gone – saved right in the set.

Street musicians
A MacBook instead of a pedalboard: the keyboard is the controller.

Teachers & workshops
Make harmony and rhythm audible – layer by layer.

Your next loop is already waiting.

Download livelooper and start playing:
