

BeatTactics

DESIGNED BY GROOVEX

THE LOOP STATION FOR YOUR DAW, MAC AND PC · VERSION 1.5

livelooper

Loop it.
Throw it.
Play it live.

livelooper turns a voice, a guitar or a beatboxed kick into a complete song – live, without ever stopping. New in 1.5: beat FX, beat repeat and stutter, colour FX, recorded drum kits with groove and fills, and Ableton Link.

VST3 · AU · Standalone · macOS · Windows · Ableton Push · Ableton Link · EN / DE

IMAGINE …

One press.
And one idea becomes a band.

Looping means: you play something, it keeps going – and you play along. Layer by layer, bar by bar. livelooper turns that into an instrument as immediate as a stompbox and as deep as a studio.

01

The stage

Saturday, 11:40 pm. One guitar, one laptop, one Push. Track 1 – chords. Track 2 – the bass through overdrive. Track 3 – a riff, in reverse. Hold REPEAT on 1/16, slide up the touch strip to 1/32 – and let go right into the chorus. The room explodes.

02

The bedroom studio

Midnight, headphones on. The 909 Style kit runs with the “Laid Back” groove and a fill every 8 bars, you just jam – nothing recording. There it was! CAPTURE brings back the last 16 bars as a loop, instantly in time. Then a spiral echo on the master, and it sounds like a record.

03

The jam

A friend with an iPad, another with a drum app, you with livelooper. Everyone switches on Ableton Link – one tempo, one beat, no counting in. Your laptop keyboard starts the tracks, Space stops everything. Nobody needs a cable.

THE INTERFACE

Everything at a glance. Everything in reach.

Designed like a hardware unit: big pads, LED rings, waveforms, a dB master VU – and a performance row with beat FX, beat repeat / stutter, colour FX and metronome right where your hand expects it.

1 Display
Tempo, bar, quantize, Link and the master VU in dB – green, yellow, red.

2 Input FX A–D
Four effects on the input – record through filter, delay or reverb.

3 FX editor
Pick the effect, turn two parameters and the mix.

4 Track FX A–D
Four more effects on the tracks – switchable per track.

5 5 or 8 tracks
Waveform, meter, pan, COLOR knob, reverse, one shot, undo/redo.

6 REC / DUB / PLAY
The big pad: record, overdub, play – the LED ring shows the loop.

7 Rhythm
4 recorded kits, 21 patterns, groove, fills, swing and feel.

8 Master
Quantize, host sync, levels, fade, ALL START / STOP.

9 MIDI learn
Click a control, move a knob – mapped. 400 functions.

10 Scenes 1–8
Switch the song part, quantized to the next bar.

11 Capture
The last 1–32 bars become a loop – no record press needed.

12 Beat FX
16 beat-synced effects, ON or HOLD, on master, loops, input or a track.

13 Beat repeat / stutter
Hold for 1/2 ... 1/32 repeats, let go – back on the beat.

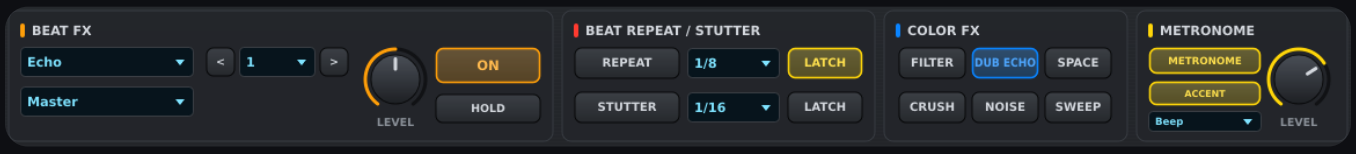

14 Colour FX
One knob per track: filter, dub echo, space, crush, noise, sweep.

15 Metronome
Click, accent, sound and level – also on the cue output.

NEW IN VERSION 1.5

Press. Hold. Let go. Back on the beat.

Version 1.5 brings the moves DJs love to your looper. Throw an echo on the last beat, hold a stutter into the drop, sweep the filter on one track – everything is locked to the beat, and the music keeps running underneath. Let go, and you are exactly in time again. It is simply fun to play.

The new performance row: beat FX, beat repeat / stutter, colour FX and metronome.

Beat FX

Delay, echo, ping pong, spiral, reverb, trans, filter, flanger, phaser, pitch, roll, slip roll, reverse roll, vinyl brake, helix, noise – 1/32 to 16 beats.

Beat repeat & stutter

Hold or latch: the slice repeats from the next grid line, 1/2 to 1/32 note. Stutter adds a choppy gate.

Colour FX

A one-knob effect per track: centre = off, left and right = two flavours. Bit-exact when you don't touch it.

Recorded drum kits

Studio, 808, 909 Style and Lo-Fi with real samples (CC0 / public domain), six groove feels and fills every 4 or 8 bars.

Ableton Link

Tempo and beat with every Link app on the network – Live, iPad, phone. Joining never changes the session tempo.

Comfort

Searchable in-app help, about window with update check, start with your last settings, recent sets one click away.

ON ABLETON PUSH - NO MAPPING

- ADD EFFECT = beat FX
- ADD TRACK = hold
- ◀ ▶ = beat
- BROWSE = FX encoders
- REPEAT = beat repeat
- ACCENT = stutter
- touch strip = 1/2 … 1/32
- FIXED LENGTH = capture 1-32
- SHIFT + METRONOME = Link

ABLETON PUSH

Hands on the pads. Eyes on the crowd.

Plug in an Ableton Push, press User – and livelooper takes over, in any DAW and in the standalone app. No mapping, no setup. Every track gets its own pad column, lit in its colour, showing where the loop is right now.

Pads
REC/PLAY and STOP for each track on top, the loop position running below as a band of light.

Encoders
Level, pan, pitch, feedback, effects – and with BROWSE the beat FX, colour FX and repeat timing.

Performance FX
ADD EFFECT = beat FX, REPEAT / ACCENT = beat repeat / stutter while held, SHIFT = latch.

Touch strip
Tape stop, filter sweep – or, with REPEAT held, the repeat timing from 1/2 to 1/32.

XY effect pad
The 8×8 grid becomes a performance pad: touch, slide, let go – back to the dry sound.

Scenes, capture, Link
Scenes on the scene buttons, FIXED LENGTH = capture 1–32 bars, SHIFT + METRONOME = Link.

RHYTHM THAT FEELS LIKE A DRUMMER

Four recorded kits, 21 patterns – and a groove: “Laid Back” sits behind the beat, “Pushed” drives ahead, “Drunk” wobbles like a late-night beat tape. Fills every 4 or 8 bars announce the next part.

Trap · Lo-Fi · Drum & Bass · Afrobeat · Dembow · UK Garage · Neo Soul · Disco · Afro House · House · Techno · Hip Hop · Funk · Rock · Bossa · Reggae

A SONG IN 90 SECONDS

This is what layer by layer sounds like.

An example of how a complete loop song comes together – with nothing but a voice and a guitar:

0:00 — **Link on, tempo 92.**
The drum app on the iPad follows. Kit “Lo-Fi”, groove “Laid Back”, fills every 8 bars.

0:05 — **Track 1 · Beatbox**
Kick and snare – quantize “Measure” cuts the loop to exactly two bars.

0:20 — **Track 2 · Guitar**
Auto record starts with the first note. Through the “Phaser” input FX, fixed loop: 4 bars.

0:40 — **Track 3 · Bass**
Just jamming – then CAPTURE: the last eight bars become the loop. COLOR knob left: warm low-pass.

0:55 — **Track 4 · Voice**
An “ooh” choir in three overdubs, a spiral echo thrown on the last beat with HOLD.

1:10 — **Scene 2 · Drop**
REPEAT held on 1/16, slide to 1/32 – let go: the chorus lands on the one.

1:30 — **Vinyl brake. ALL STOP.**
The beat FX brakes the master like a turntable. Then: export stems. Applause.

BY THE NUMBERS

PATTERNS

400
MIDI FUNCTIONS

MIDI, NO DETOURS

Click MIDI LEARN, click a control, then move a knob or hit a pad on your controller. Done. The purple frames always show what is already mapped.

THE FEATURES IN DETAIL

Built for the moment that counts.

Up to eight loop tracks

REC → DUB → PLAY on one pad, STOP (hold = clear), undo/redo, level, pan, reverse, one shot – 5 or 8 tracks, fixed lengths or free.

Beat FX, repeat & stutter

16 beat-synced effects plus beat repeat and stutter from 1/2 to 1/32 – hold, latch, let go: always back on the beat.

Recorded drum kits

Studio, 808, 909 Style and Lo-Fi with real samples, 21 patterns, six groove feels, fills, swing and feel.

Scenes

8 scenes store which tracks play. One press – and at the next bar the song moves from verse to chorus.

Capture & auto record

Capture brings back the last 1–32 bars you played. Auto record starts with the first note – hands stay on the instrument.

Ableton Push

Pads with state and loop position, encoders, XY effect pad – and now beat FX, repeat and stutter on the buttons and touch strip.

Ableton Link

Play in time with Live, iPad apps and other laptops on the same network – no cables, no counting in.

Sound per track

Colour FX knob, tape-echo feedback, sidechain ducking, pitch ±12, time-stretch on tempo changes, resampling.

Everything on MIDI

All 400 functions are host parameters for your DAW's MIDI mapping and automation – plus MIDI learn via right-click.

Separate outputs

Each track on its own output in your DAW or interface. Metronome on a cue output for your headphones.

Sets, stems & drag

Loops saved losslessly with your project, looper sets, stem export – or drag a loop straight onto a DAW track.

Help, updates, two languages

Searchable help inside the app, update check, last-used settings on start. English and German.

PLAY IT FROM THE KEYBOARD

Your MacBook is the controller.

In the standalone app every function is one key away – laid out like the tracks themselves: one keyboard column per track. Under SETUP → Keyboard mapping you set your own keys, with Shift, Ctrl, Option or Cmd.

TRACK 1	TRACK 2	TRACK 3	TRACK 4	TRACK 5	
1	2	3	4	5	REC/PLAY
Q	W	E	R	T	STOP · WITH SHIFT: CLEAR
A	S	D	F	G	UNDO · WITH SHIFT: REDO

Space	All start / stop	**Return**	Tap tempo	**B**	Type in tempo	**↑ ↓**	Tempo ± 1 BPM
M	Rhythm on/off	**N**	Next pattern	**K**	Quantize	**Shift + ⌫**	Clear all

Your own mapping: click a function, press a key – done.

Type the BPM right on the display.

SPECIFICATIONS

livelooper

FORMATS	VST3 · Audio Unit (macOS) · standalone app
SYSTEMS	macOS 11 or later (universal) · Windows 10/11 (64-bit)
INSTALL	Installer (.pkg / setup.exe) or ZIP – your choice
TRACKS	5 or 8 stereo loop tracks, up to 480 s per track, 8 scenes, capture 1–32 bars
EFFECTS	12 types in 8 slots · 16 beat FX · beat repeat / stutter · 6 colour FX
RHYTHM	4 recorded kits, 21 patterns, 6 grooves, fills, swing, feel, metronome with 4 sounds
SYNC	Host tempo and transport · Ableton Link · internal clock 40–300 BPM
CONTROL	400 MIDI functions, MIDI learn, Ableton Push, keyboard (standalone)
STORAGE	Loops in the project (FLAC 24 bit) · sets · WAV and stem export
LICENSE	Free software, GNU AGPLv3 · English and German

MADE FOR

Singer-songwriters
Backing, choir and bass – all from your own voice and guitar.

Beatboxers
Kick, snare, hi-hat: a groove in seconds that never drifts.

Guitarists & bassists
Lay down the rhythm, solo on top, experiment in reverse.

Producers
Capture ideas in your DAW before they're gone – saved right in the project.

Street musicians
A MacBook instead of a pedalboard: the keyboard is the controller.

Teachers & workshops
Make harmony and rhythm audible – layer by layer.

Your next loop is already waiting.
